

Sharing the fertility pathway with you.

Dr Kellie Tathem

Queensland Fertility Group. Level 1, 203 Wharf Street, Spring Hill QLD 4000

Dear Patient,

Thank you for contacting QFG in regard to booking in with me. It would be helpful to have the following test results arranged before our first appointment so that we can devise a tailored fertility plan for you as quickly and as smoothly as possible.

For Couples (Heterosexual)

- ◆ Both partners should obtain a referral from your GP and attend the appointment together (or via telehealth if needed).

For Male Patients

Before your appointment, please ask your GP to arrange:

- ◆ A semen analysis at a Virtus Health centre
- ◆ Blood tests for HIV, Hepatitis B & C and Syphilis

For Female Patients (Planning Pregnancy)

Before your appointment, we recommend:

- ◆ A prenatal blood test (FBC, Blood group & antibody screen, Rubella & Varicella immunity, HIV, Hepatitis B & C, Syphilis)
- ◆ Genetic Carrier Screening (Your GP can order this; options & costs via this QR code)
- ◆ Pelvic Ultrasound day 5-10 of cycle including antral follicle count
- ◆ Hormones day 1-3 of cycle, FSH, E2, LH & AMH

How do you get a referral?

You can get a referral from your GP, or if you prefer, you can go online to Doctors on Demand and pay a consultation fee to generate a referral to me by scanning the QR code to the right. I would be pleased to support you on your path to expanding or building your family. You can also call **1800 111 483**, or ask your GP to use the referral forms in the GP resource tab of www.qfg.com.au

I look forward to continuing to provide expert advice for you and again extend my appreciation for entrusting me with your fertility journey. Call me any time on **(07) 3015 3183** to talk to my helpful reception staff.

Warm regards,

Kellie Tathem,

Fertility and IVF, Specialist Egg Freezing, Obstetrics, Gynaecology.
